

DATA ANALYTICS PROJECT 3

(SQL DATA ANALYSIS)

Name: Precious Akinluyi

Program: DecodeLabs Internship

Date: May 2026

INTRODUCTION

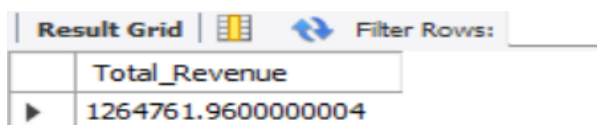

This project demonstrates the use of SQL queries to extract meaningful insights from an e-commerce dataset. The analysis involves the use of SELECT, WHERE, GROUP BY, ORDER BY, and aggregate functions such as SUM, COUNT, and AVG.

QUESTION 1: Total Revenue

```
SELECT SUM(`Total Price`) AS Total_Revenue  
FROM `data analytics_`;
```

Insight:

The total revenue represents the overall income generated from all transactions.

The screenshot shows a database interface with a 'Result Grid' tab. It contains a single row with the column 'Total_Revenue' and the value '1264761.9600000004'. There is a 'Filter Rows' button and a search bar.

	Total_Revenue
▶	1264761.9600000004

QUESTION 2: Total Quantity Sold

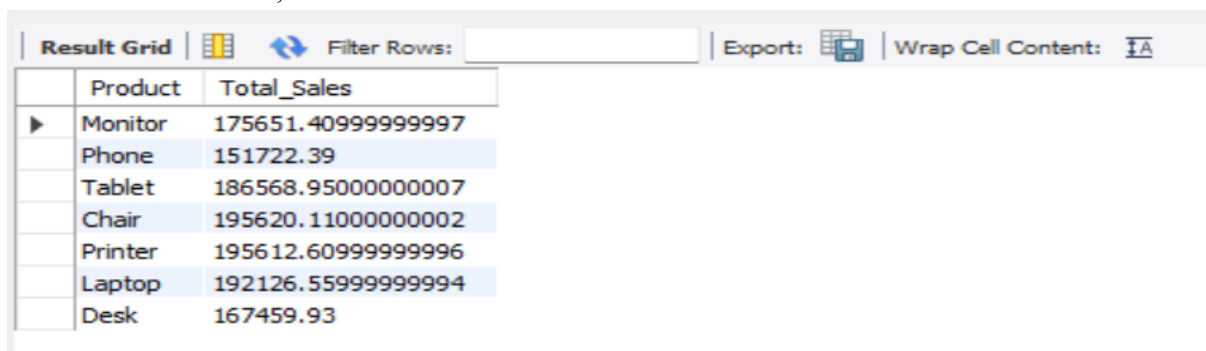

```
SELECT SUM(Quantity) AS Total_Quantity  
FROM `data analytics_`;
```

Insight:

This shows the total number of items sold.

QUESTION 3: Total Sales by Product

```
SELECT Product,  
SUM(`Total Price`) AS Total_Sales  
FROM `data analytics_`  
GROUP BY Product;
```

The screenshot shows a database interface with a 'Result Grid' tab. It displays a table with two columns: 'Product' and 'Total_Sales'. The table lists seven products and their corresponding total sales values. There is a 'Filter Rows' button, an 'Export' button, and a 'Wrap Cell Content' button.

	Product	Total_Sales
▶	Monitor	175651.40999999997
	Phone	151722.39
	Tablet	186568.95000000007
	Chair	195620.11000000002
	Printer	195612.60999999996
	Laptop	192126.55999999994
	Desk	167459.93

Insight:

This reveals how much revenue each product generated.

QUESTION 4: Total Quantity by Product

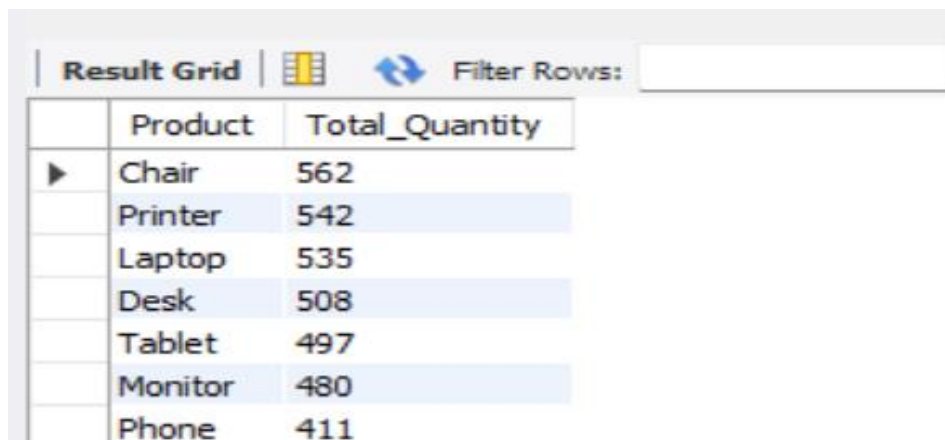

```
SELECT Product,  
SUM(Quantity) AS Total_Quantity  
FROM `data analytics`  
GROUP BY Product;
```

Insight:

This identifies the most frequently purchased products.

QUESTION 5: Top-Selling Product

```
SELECT Product,  
SUM(Quantity) AS Total_Quantity  
FROM `data analytics`  
GROUP BY Product  
ORDER BY Total_Quantity DESC;
```

The screenshot shows a SQL query result grid with the following data:

	Product	Total_Quantity
▶	Chair	562
	Printer	542
	Laptop	535
	Desk	508
	Tablet	497
	Monitor	480
	Phone	411

Insight:

The product at the top has the highest demand.

QUESTION 6: Average Order Value

```
SELECT AVG(`Total Price`) AS Avg_Order_Value  
FROM `data analytics`;
```

Insight:

Shows the average amount customers spend per order.

QUESTION 7: Orders Paid with Credit Card

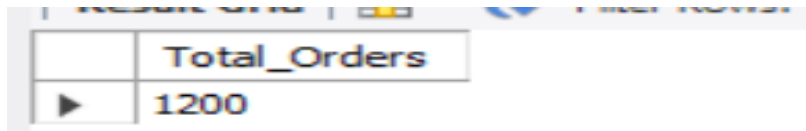

```
SELECT *  
FROM `data analytics_`  
WHERE `Payment Method` = 'Credit Card';
```

Insight:

Filters transactions made using credit cards.

QUESTION 8: Total Number of Orders

```
SELECT COUNT(*) AS Total_Orders  
FROM `data analytics_`;
```

Total_Orders
1200

Insight:

Shows how many orders were placed.

QUESTION 9: Orders by Status

```
SELECT `Order Status`,  
COUNT(*) AS Total_Orders  
FROM `data analytics_`  
GROUP BY `Order Status`;
```

Insight:

Shows how orders are distributed (Delivered, Cancelled, Returned).

QUESTION 10: Revenue by Payment Method

```
SELECT `Payment Method`,  
SUM(`Total Price`) AS Revenue  
FROM `data analytics_`  
GROUP BY `Payment Method`;
```

Insight:

Shows which payment methods generate the most revenue.

QUESTION 11: Top 5 Highest Orders

```
SELECT *  
FROM `data analytics`_  
ORDER BY `Total Price` DESC  
LIMIT 5;
```

Insight:

Displays the highest-value transactions.

QUESTION 12: Revenue by Referral Source

```
SELECT `Referral Source`,  
SUM(`Total Price`) AS Revenue  
FROM `data analytics`_  
GROUP BY `Referral Source`;
```

Insight:

Identifies which marketing channel generates the most sales.

QUESTION 13: Orders with Quantity Greater Than 3

```
SELECT *  
FROM `data analytics`_  
WHERE Quantity > 3;
```

Result Grid

Filter Rows:

Export:

Wrap Cell Content:

	Order ID	Date	Customer ID	Product	Quantity	Unit Price	Shipping Address	Payment Method	Order Status
	ORD200000	4-Jan-2023	C72649	Monitor	5	570.62	928 Main St	Debit Card	Shipped
	ORD200002	27-Feb-2024	C81728	Tablet	5	550.68	512 Main St	Credit Card	Cancelled
	ORD200004	8-May-2025	C81840	Printer	4	626.01	668 Main St	Online	Delivered
	ORD200007	12-May-2023	C41460	Monitor	5	149.55	706 Main St	Cash	Shipped
	ORD200009	21-Nov-2023	C31946	Desk	4	509.38	102 Main St	Credit Card	Shipped
	ORD200010	29-Dec-2023	C43443	T Desk	5	625.97	333 Main St	Credit Card	Returned
	ORD200019	23-Jan-2023	C14552	Monitor	5	224	273 Main St	Cash	Returned

Insight:

This query filters and displays orders where customers purchased more than three units, indicating bulk or high-volume orders.

QUESTION 14: Revenue from Delivered Orders

```
SELECT SUM(`Total Price`) AS Delivered_Revenue  
FROM `data analytics`_  
WHERE `Order Status` = 'Delivered';
```

Result Grid				Filter Rows:
	Delivered_Revenue			
▶	242600.31999999998			

Insight:

This shows the total revenue generated from successfully completed (delivered) orders, representing actual sales revenue.
